[COMPREHENSION]

Q.16. Read the following passage carefully and answer the questions given below

it-

[2×4=8]

"What is noise? Any unpleasant sound is noise. It's something we don't like. It's something that makes us cover our ears. The wail of a fire engine, a clap of thunder, the screech of a car's tyres when the brakes are put on suddenly. Well today sound can be measured scientifically. The level of sound is measured in decibels. A decibel meter in a quiet bedroom may register around 35 decibels. In a class room it may register around 50 decibels. This level is comfortable on the ears."

(7)

Questions :

- (1) What is the difference between 'sound' and 'noise'?
- (2) List out three examples of noise.
- (3) What is the unit of measuring sound called?
- (4) Up to what level is sound tolerable to the human ear?
